THE  
**Sydney Morning Herald.**  
SATURDAY, SEPTEMBER 26, 1846.

Scorn to no master, of no sect am I.

ISSUE OF DEPARTING LICENSES.

ALTHOUGH the Squatting Question will probably stand in abeyance until next year, we ought not to overlook a paper on that subject printed by order of the Council four months ago, containing information public, we believe, so circumstantially made public before.

It is a "Return of all Departing Licenses in the several Districts of the Colonies of Crown Lands beyond the boundaries of location; distinguishing the names of the occupiers, and the amount paid for such licenses by each individual, during the year commencing 1st July, 1845, and ending the 30th June, 1846."

The Return does not quite correspond with its title, for instead of embracing the whole year, it reaches only to the 18th of May, and is made up in three different periods, 31st December, 20th March, and 18th May.

As the particulars given to the end of last year may serve to throw some new light upon the return of live stock at the same period, we shall notice it separately. Many persons holding more than one license in the same district, it is necessary to distinguish between the number of licenses and the number of graziers. The licenses taken out for the several districts, between the 1st July and 31st December, 1845, were therefore as follows:—

| Districts.       | Licenses. | Graziers. | Fees Paid.   |
|------------------|-----------|-----------|--------------|
| Bligh            | 122       | 88        | \$1,269      |
| Clarence River   | 62        | 54        | \$771        |
| Darling Downs    | 24        | 20        | \$311        |
| Lachlan          | 178       | 136       | \$2,124      |
| Liverpool Plains | 176       | 121       | \$2,703      |
| Murray River     | 41        | 33        | \$440        |
| Maneroo          | 155       | 121       | \$2,221      |
| Moreton Bay      | 132       | 102       | \$1,484      |
| Murrumbidgee     | 167       | 146       | \$1,991      |
| New England      | 75        | 68        | \$1,490      |
| Wellington       | 113       | 89        | \$1,432      |
| Totals           | 1130      | 879       | \$15,584 10s |

In endeavouring to arrive at an average of the stock depastured under each license, by comparing the above return with that given at page 5 of the COLONIAL SECRETARY'S Book of Statistics, we must bear in mind that the great inequality of the runs, in point of pasturage, water, &c., renders any thing like accuracy quite unattainable. Still, however, as this is the only guide we possess to approximate results, we must be content with it. The averages per license, at the end of the year 1845, appear then to have been about as follows:—

|                        |      |     |
|------------------------|------|-----|
| Clarence River .....   | 64   | 56  |
| Darling Downs .....    | 35   | 30  |
| Lachlan .....          | 184  | 147 |
| Liverpool Plains ..... | 195  | 137 |
| Leay River .....       | 44   | 35  |
| Maneroo .....          | 173  | 148 |
| Moreton Bay .....      | 36   | 34  |
| Murrumbidgee .....     | 177  | 166 |
| New England .....      | 96   | 86  |
| Wellington .....       | 117  | 73  |
| Totals .....           | 1255 | 991 |

According to these results, the largest number of horses under each license run is in the Maneroo district, being 33, and the smallest in the Bligh district, 6; the largest number of cattle in the Liverpool Plains district, 1010, and the smallest in the Bligh district, 290; the largest number of sheep in the Darling Downs district, 8765, and the smallest in the Murrumbidgee district, 55. The average amount paid for each license was about £13 15s. 6d., by each grazier, £17 11s. 10d., and for each horse, head of cattle, and sheep depastured, rather more than one penny.

The number of licenses taken out between the 31st December, 1845, and the 18th May, 1846, added to those enumerated above, make, for the broken period to the 1st July, 1845, to the last-mentioned date, the following totals:—

| Licenses.        | Graziers. | Fees Paid. |
|------------------|-----------|------------|
| Bligh            | 134       | 79         |
| Clarence River   | 44        | 56         |
| Darling Downs    | 35        | 30         |
| Lachlan          | 184       | 147        |
| Liverpool Plains | 195       | 137        |
| Murray River     | 44        | 35         |
| Maneroo          | 173       | 148        |
| Moreton Bay      | 36        | 34         |
| Murrumbidgee     | 177       | 166        |
| New England      | 96        | 86         |
| Wellington       | 117       | 73         |
| Totals           | 1255      | 991        |

It would thus appear that the district for which the largest number of licenses were taken out was Liverpool Plains; and the smallest, Darling Downs.

LEGISLATIVE COUNCIL.

THE SPEAKER took the chair at the usual hour.

JEWISH SYNAGOGUE.

A messenger from His Excellency the Governor having been announced, Mr. Private Secretary Pitt-Roy was introduced, and presented the following MESSAGE.

CHARLES A. FITZ ROY, Governor.

In reply to the address of the Legislative Council, dated the 18th, and submitted to the Governor by their Speaker on the 22nd inst., His Excellency now places before the Council an estimate for the sum of £1000, for the purpose of liquidating the debt due to the erection of the Jewish Synagogue at Sydney.

With respect to the further request of the Legislative Council, that the Governor would also place on the estimate for the ensuing year, not exceeding £200, for the support of a Jewish minister of religion; as it would appear that the grant might lead to a permanent charge on the revenue, and, moreover, that it is a measure of an unusual, and as far as he is aware, of an unprecedented nature, the Governor deems it his duty to refer to Her Majesty's decision.

While thus evincing his desire to comply, as far as he consistently can, with the wishes of the Legislative Council, the Governor begs to represent to the Council, that while the financial arrangements for the ensuing year have been made with the utmost attention to economy, which the efficiency of the public service of this territory will admit of, the surplus calculated upon in the estimates is not more than sufficient to cover such deficiencies as may possibly arise from a failure in the collection of the revenue to be collected, and therefore, that any extensive encroachments upon this fund may lead to future inconvenience.

GOVERNMENT HOUSE.

Sydney 25th September.

The above message was ordered, upon the motion of the COLONIAL SECRETARY, to be printed and taken into consideration on Wednesday next.

MOLOG.

Mr. SUTTOR presented a petition from the Rev. Henry H. Hobart, of Parramatta, Elizabeth Mary, his wife, formerly Elizabeth Mary Hobart, formerly of Parramatta, merchant, and Patrick Hill, Esq., of Parramatta, setting forth that they possessed a piece of land at Molong, in the county of Wellington, beneath the surface of which, and in the immediate neighbourhood, there was a large quantity of coal, and as to hold out great advantages for mining and smelting operations. The necessary works, however, would be attended with considerable outlay, and the petitioners laboured under great pecuniary difficulties, inasmuch as they possessed no power to grant leases of any portion of the land, or license to dig for the metal for any longer period than their own lives. They prayed, that a Bill might be passed, authorizing the Council to give them the power of granting leases for any term not exceeding fifty years.

The petition having been read and received, Mr. SUTTOR moved, that the Government Gazette of the 26th of August last, containing a notice of the petitioners' intention to apply for the above-mentioned Bill, and also called a witness who proved the posting of the petition on the 26th of August last, and on the door of the place used as a church at Bathurst. This, he said, was about thirty miles from Molong, but the places in question were the nearest places of worship.

Mr. WINDEYER pointed out that in the Standing Orders the term "witness" was used in reference to the proof of notice, as if the evidence of one witness would not be sufficient.

Mr. COWPER thought that this expression referred to Sydney, where the clerks of the various churches would be called, but that it did not require more than one witness to prove the posting of the notice upon a particular church.

After some further conversation, Mr. SUTTOR gave notice of his intention, on Tuesday next, to move for leave to bring in a Bill for the purpose of enabling Mr. Hobart and his wife, and their trustees, to grant leases of land at Molong, in the county of Wellington, for any term not exceeding fifty years.

MANEROO.

Mr. MURRAY presented a petition from the inhabitants of Maneroo, complaining of the inconvenience which they sustained for going to a Court of Petty Sessions, and for going to the Magistrate's Bench whenever the interference of the magistracy was necessary. The petitioners said that they paid assessments upon 4000 acres, 100,000 lbs. of cattle, and 200,000 sheep, contributing towards the revenue no less than £4428, for which they received no protection in return.

The petition was read and received, and Mr. MURRAY gave notice of his intention, on Tuesday next, to move that it be printed.

UPSET PRICE OF LAND.

The COLONIAL SECRETARY stated, as a point of order, that in the proof sheet of the votes and proceedings which he first saw, and the smallest in the Bligh district, 6; the largest number of cattle in the Liverpool Plains district, 1010, and the smallest in the Bligh district, 290; the largest number of sheep in the Darling Downs district, 8765, and the smallest in the Murrumbidgee district, 55. The average amount paid for each license was about £13 15s. 6d., by each grazier, £17 11s. 10d., and for each horse, head of cattle, and sheep depastured, rather more than one penny.

The number of licenses taken out between the 31st December, 1845, and the 18th May, 1846, added to those enumerated above, make, for the broken period to the 1st July, 1845, to the last-mentioned date, the following totals:—

public feeling on this question, arising in some measure, perhaps, in forgetfulness of its importance, mixed up with another element, to which he should have hitherto alluded; but whatever was the cause, he found that the opinion of the House on the subject had never been definitely and decidedly expressed. The Committee brought up their report on the 15th of December, 1845, the honorable member for Murray moved the adoption of the report. This motion was opposed by several honorable members, who alleged they were taken by surprise, the report having only been put into their hands the day before. In the discussion which ensued, he found, by looking to the votes and proceedings, that there were three divisions. The House divided on the adoption of the report, which was carried by a majority of 14 to 5, the opposition to it having been, as he had before stated, treated by the hasty manner in which the subject was brought on after the report was printed. Mr. Murray then proceeded to propose a series of resolutions founded on the report, some of which were of a temporary and provisional nature. The first of these resolutions was, "That the waste lands of this colony constitute an important element of national wealth, which must be dormant and unproductive until brought under the occupancy of cultivation. On this resolution the question was put and passed. The second resolution was, "That immigration to this territory, the extension of its population, and the occupation of its waste lands, be seriously checked and retarded so long as 20s. an acre shall be, either by law, or by regulation, the minimum upper price of the waste Crown lands in this colony, and the territory which he considered, the only strong and definite opinion expressed by the Council on the subject, and this resolution was, that the value of the land should be determined by the profit derivable from it; and that a minimum price of 20s. an acre so far exceeds all attainable profits in most instances, that it virtually amounts to a prohibition upon the land being sold or leased at a price which would not be sufficient to cover the cost of the land, and the cost of the improvements which he had to make to it; and that a minimum price of 20s. an acre so far exceeds all attainable profits in most instances, that it virtually amounts to a prohibition upon the land being sold or leased at a price which would not be sufficient to cover the cost of the land, and the cost of the improvements which he had to make to it; and that a minimum price of 20s. an acre so far exceeds all attainable profits in most instances, that it virtually amounts to a prohibition upon the land being sold or leased at a price which would not be sufficient to cover the cost of the land, and the cost of the improvements which he had to make to it; and that a minimum price of 20s. an acre so far exceeds all attainable profits in most instances, that it virtually amounts to a prohibition upon the land being sold or leased at a price which would not be sufficient to cover the cost of the land, and the cost of the improvements which he had to make to it;
